Klose Scholarships for math and science education majors

A gift of nearly $7.5 million from the estate of Doris and Ralph Klose funds scholarships for Wichita State University students preparing to teach science and math. It is the largest known gift in the nation to fund scholarships with this emphasis. Each fall, approximately 20 students will receive the scholarship based on high GPAs and a major in math or science education, middle school or secondary. The scholarships will cover tuition, fees and books for the recipients’ junior and senior years. To apply for this scholarship, the general COE Scholarship/Fellowship application is used. The link is found on this webpage or can be accessed by current WSU College of Education Students through their Blackboard list of courses.
