The Department of Chemistry and Biochemistry at the University of Arkansas is seeking an outstanding scientist for a tenure-track faculty position associated with the NII NCRR Center for Protein Structure and Function. (http://www.uark.edu/chemistry). We seek candidates with expertise in the use of modern optical spectroscopy for investigating proteins and biomolecules, including single-molecule methods or other novel approaches. The department has state-of-the-art core facilities in NMR spectroscopy, protein and small molecule X-ray crystallography, mass spectrometry, and high-throughput synthesis. Collaborative, multidisciplinary research projects are encouraged. Successful candidates must have a Ph.D. and will be expected to establish a nationally funded research program, and teach effectively at the graduate and undergraduate levels.

The University of Arkansas is a major Ph.D. – granting institution located in Fayetteville, a rapidly growing community of 53,000 situated in the Ozark Mountains in the northwest corner of the state. Cited in national surveys as one of the top ten cities in which to live, there are ample opportunities for cultural and recreational activities.

Review of completed applications will continue until the position is filled. A Curriculum vitae, statements of research plans and teaching interests, and three letters of recommendation should be sent to: Dr. Frank Millett, Faculty Search Committee, Department of Chemistry and Biochemistry, University of Arkansas, Fayetteville, AR 72701 (millett@uark.edu).

Women and minority candidates are strongly encouraged to apply. The University of Arkansas is an Affirmative Action/Equal Opportunity Employer. All applicants are subject to public disclosure under the Arkansas Freedom of Information Act, and persons hired must have proof of legal authority to work in the United States.
