ACKNOWLEDGEMENT OF RECEIPT
OF ESSENTIAL FUNCTIONS REQUIREMENTS
(Non-academic)

Essential functions include the requirements needed by a student to successfully participate in educational and training activities while not endangering the public, other students, patients and their test results. The technical standards listed represent the essential non-academic requirements that students must master to successfully participate in the Medical Technology Program and become employable.

1. VISION
   The student must be able to follow instructions, interpret charts, graphs, and test results, discriminate major colors, and use a microscope to observe and identify specimen characteristics.

2. COMMUNICATION SKILLS
   The student must be able to communicate effectively, and to accurately receive and transmit information.

3. MOVEMENT
   The student must be able to move freely from one location to another in the clinical laboratory and patient’s room.

4. FINE MOTOR FUNCTIONS
   The student must possess the motor skills necessary to safely and accurately perform diagnostic laboratory procedures, manipulate and operate instruments and equipment, performs phlebotomy, and to lift and move objects.

5. EMOTIONAL STABILITY
   The student must be able to make full use of his/her intellectual ability at all times and be able to recognize and respond appropriately to emergency and other non-routine situations.

I acknowledge that I have received and read the requirements of non-academic essential functions for the Medical Technology program. By signing herein, I acknowledge that I have read and understand the statements above.
