Shocker STEM Camps
Discover Your World

June 19-22. 9:00 a.m. – 4:00 p.m.
For boys and girls who have completed grades 6 - 8

June 26-29 9:00 a.m. – 4:00 p.m.
For boys and girls who have completed grades 3 - 5

Campers will spend four days performing hands-on and minds-on activities as they explore a variety of STEM (Science, Technology, Engineering, and Mathematics) topics including:

- Programming
- Forensic Science (CSI)
- The Principles of Rocketry
- Designing and building a container to safely “land a rover on Mars”
- Activities in Chemistry including a demonstration with Liquid Nitrogen
- and much more

Each of these activities will be about three hours long (including a 15-minute break) so campers will have an opportunity to delve into each topic. In the case of an engineering design activity, they will have an opportunity to design, build, test, evaluate the results of the test, redesign, and rebuild. Campers will participate in a total of eight different activities during the camp.

The Shocker STEM camps are sponsored by the Wichita State University College of Education and will be held at WSU. The cost for each 4-day camp is $100 and campers will need to bring a sack lunch and snacks each day. Additional information including where on campus drop your child off will be available after you register.
