I. DPT Proposal Review
   - Dean Kovar briefly reviewed the proposal and the steps the proposal will go through after completing this meeting. The faculty present did not have any issues or concerns regarding the proposal. The proposal will now move forward to the graduate faculty for action via ballot by mail. The Dean thanked everyone for their time and effort regarding this proposal.

II. As May Arise
   - A Graduate Student Advisory Board has been organized under the direction of Dr. Kahol. The group is still in need of a student representative from the College of Health Professions.
   - The Anderson Fellowship has been given out this semester to a graduate student currently employed as a school nurse. Dr Kahol believes there is now a consistent way of getting the word out to school nurses about the availability of this fellowship.
   - A development officer has been hired, and Karen Berry is her name. She will be helping with fund raising for the Graduate School, Research Office and NIAR. Dean Kovar reviewed the process for program areas to request fund raising for a specific graduate fellowship or for other program needs.
   - The next Graduate Coordinators Meeting will be May 5, 2004. The main topic will be program assessment.
