Preparation for a Profession in Optometry

A bachelor’s degree is not required for admissions into most optometry schools, although most successful applicants have completed a bachelor’s degree. Optometry schools expect candidates to demonstrate the intellectual, analytical, and problem-solving skills necessary to succeed in their programs. Students are strongly advised to balance coursework in the natural sciences with coursework in humanities and social sciences. The General Education component of a Liberal Arts degree provides a sound foundation for demonstrating an interest in and knowledge of a diverse and global society. Candidates should also consider coursework in areas such as anthropology, communication, economics, ethics, logic, psychology, sociology, and statistics.

Most schools base admissions decisions on a balanced combination of the following:

- Grade point average: This varies by school but is usually above a 3.0 minimum.
- OAT scores (Optometry Admission Test)
- Personal statement from the candidate
- Professional experience (employment, volunteer work, shadowing, etc.)
- Interview
- Recommendations from academic instructors (usually in the sciences), an academic advisor, and an optometrist.

Core Courses for Optometry Programs: a minimum requirement

- Engl 101 English Composition I (3) and 102 English Composition II (3)
- Comm 111 Public Speaking (3)
- Math 111 College Algebra (3) and 123 College Trigonometry (3) or Math 112 Pre-Calculus (5)
- Chemistry 211 General Chem. I (5) and 212 General Chem. II (5)
- Chemistry 531 Organic Chemistry I (5) and 532 Organic Chemistry II (5)
- Biology 210 General Biology I (4) and 211 General Biology II (4)
- Biology 527 Comparative Anatomy (5) and Biology 534/535 Mammalian Physiology w/lab (5)
- Physics 213 General Physics I (5) and 214 General Physics II (5) or
- Physics 313 University Physics I with lab (315) and 314 University Physics II with lab (316)

The core classes above meet the minimum prerequisites for admission to most optometry schools, however many schools also require advanced courses in biology, chemistry, and mathematics. Students should check with the specific schools they are interested in for a list of specific requirements. For most schools, the following are necessary in addition to the core:

- Math 242 Calculus I (5) and Biology 330 Microbiology (5) and Chemistry 661 Introductory Biochemistry (3)
- Statistics 370 Elementary Statistics (3) and Psychology 111 General Psychology (3)

Admission Test: The Optometry Admission Test (OAT) is required for admission to optometry schools. Optometry school admission is very competitive. Most successful applicants have a GPA of at least 3.3 and an OAT score of 320 or higher.
**Application:** The application period for optometry schools occurs during the fall and early spring before the fall semester one wishes to begin optometry studies. Students will apply directly to the optometry schools that they wish to attend.
