The Media Resources Center (MRC) provides centralized support and innovative leadership for effective and creative use of instructional technologies and informational services throughout Wichita State University.

**CAMPUS MEDIA SERVICES**

Lindquist 100 and Geology 101 received digital HD projectors, nearly doubling brightness and enlarging the projected image.

Jabara 127 and 128 now have much brighter laser light source digital HD projectors.

McKnight 210 now features two full HD laser light source projectors that are much brighter and have much better color reproduction than the older projectors.

Currently using wireless digital projection in labs in the Experiential Engineering Building, with plans to include it in almost every classroom and lab in WSU Old Town and the Law Enforcement Training Center.

Thanks to the student Technology Fee, CMS will spend the summer upgrading 45 of the oldest and most used classroom projectors with new projectors that are 30% brighter and Full HD resolution.

Adding over 25 new MRC-supported classrooms, labs, and conference rooms, CMS designed the A/V plan and is coordinating the installation of all A/V equipment in the new WSU Old Town shared WSU/WATC space.

WSUTV and VIDEO SERVICES

Preserve Every Piece: Conservation of the Joan Miró Mural Personnages Oiseaux
Video Services was proud to present this thirty-minute documentary following the conservation journey of Kansas’ most important work of art. For nearly a decade, our videographers gathered interviews and footage documenting the courageous effort to save the Personnages Oiseaux mural.

Creative Empowerment: Boot Steps
Partnering with the WSU School of Social Work and the Robert J. Dole VA Medical Center, Video Services produced a thirty-minute program documenting the work of the Wichita State Social Work 611J graduate class with Wichita-area veterans who have experienced homelessness. The video follows veterans, students, and instructors over a three-week period as they explored art as a form of self-discovery, from their first creations to the final art gallery showing.

Strategic Enrollment Management: Personalized Admission Welcome Videos
In collaboration with WSU Admissions, Video Services produced a customizable video to be provided for every admitted high school senior. In three different instances, the student’s name appears as she is introduced to Shocker Hall, invited for coffee in the Rhatigan Student Center, and welcomed into Shocker Nation with WSU Head Coach Gregg Marshall in Koch Arena. The videos are being emailed to all Wichita State admitted students, providing a unique and personal experience they are sure to enjoy.

MRC WEB TEAM

Get Started At Wichita State
Find the opportunities available to WSU employees

The MRC web team started this year, working to prepare Wichita State for the new OJU Campus content management system. Developing training and strategic plans for the launch, the team isn’t standing still. We have already taken on several new web projects as we have gotten the team up to speed.

LOOKING AHEAD TO 2018

Change is our middle name at the MRC, and 2018 will bring more change than usual. We will be reorganizing with the new fiscal year to make sure we can bring the university our services as efficiently as possible. And we will be a big part of the transition into the new Content Management System.

But the biggest change in the new year will be the move to online, streaming delivery for WSU TV. It’s time for WSU’s video content to move with the times and make itself available on demand to a worldwide audience. We will discontinue our broadcast on Cox Cable (in the Wichita area) and will launch a new website for video delivery, a Roku streaming station, and more as the year goes on.
