Wichita State University Online

Logging in to Your Course

1. Most online courses are designed in Blackboard. If you are taking a math course, however, these instructions will not work for you. Please contact your professor for instructions if you are taking math.

2. Navigate to the Wichita State Homepage:
   http://www.wichita.edu/thisis/

3. On the right side of the screen, click the tab that says “Bb.” This will take you to Blackboard. You can also go there directly by using this link: https://blackboard.wichita.edu.

4. In the middle of the screen, you will type in your WSUid as your user name and your regular WSU password for the password.

5. This will take you to your own Blackboard course listing. Your courses for this semester should be listed under “courses”; however, professors can turn off your access while they are working on the course development. If your professor has turned off access, you may not see a link to your course. If you do not see a course link, you can verify your enrollment by checking your schedule. The course will “show up” when the professor makes it available.
