The “Ins and Outs” of Joint Ventures and Teaming

For small businesses, teaming and joint venturing can be critical to improving competitiveness and winning larger contracts. But if you “team,” you must do it right. Many pitfalls exist for the unwary, and failing to understand or abide by the regulations can lead to ineligibility—or worse. Join government contracts attorney Steven Koprince for an in-depth seminar exploring best practices of joint venturing and prime/subcontractor teaming for small businesses. This seminar will help give small businesses the know-how they need to form compliant joint ventures and teams, including size and socioeconomic considerations, mandatory and recommended contractual provisions, and the much-discussed but little-understood subcontracting limits.

Date
Tuesday, December 9, 2014
